

Proudly present a new product from Karin Herzog

Erase & Raise

This **lifting, anti-wrinkle** and **moisturising** serum is the **very latest innovation** from the Laboratoire Dr Paul et Karin Herzog SA. It contains naturally effective fine ingredients: **Hyaluronic Acid, Vitamin E, Camomile** and **Niacinamide (Vitamin B3)**.

Hyaluronic Acid is incorporated into 'ER' in its **smallest molecular mass**, thus ensuring **more effective penetration** in the initial applications to the skin. Capable of absorbing **10 times its own weight in water**, it **naturally fills fine lines, smoothes the skin** and has a **satisfying moisturising effect**.

Vitamin E, just one of the ingredients in this wonderful serum, is a proven **anti-oxidant** and provides **natural protection against UV radiation**, as well as having a **fat-free nourishing effect**, suitable for all types of skin.

Camomile has a **calming effect**, inducing a feeling of **well-being**. By nature it is mildly **antiseptic**, creating a sensation of **purity** and **freshness**.

The Group B vitamin, **Niacinamide (Vitamin B3)**, has considerable affinity with the skin, thanks to its **smoothing** and **regulating effect**.

'**ER Force 4**' is perfectly blended for **normal or combination skin types**.

This serum can be used **every day** and **as often as you wish**. It is your **defence against ageing**, from your mid-thirties and throughout your life.

Used by itself, 'ER' gives highly satisfactory results.

However, combined with the 'Vita-A-Kombi' anti-wrinkle cream from Karin Herzog, the results are **even more spectacular**. This is why: thanks to its **stabilised oxygen** content, when 'Vita-A-Kombi' comes into contact with the skin, it releases **2 molecules of water** for each molecule of oxygen. Then the Hyaluronic Acid **combines** with this large volume of released water and **fills the intercellular spaces**, thus ensuring **wrinkle-free** skin!

Not only that, thanks to the patented 'Vita-A-Kombi' formula, the **Vitamin A** in this cream is **acidified by the oxygen** beneath the skin, thus providing the raw material essential **for the natural formation of collagen**. Hyaluronic Acid and collagen are **vital for maintaining the structure** of the skin layers. **Collagen** ensures that the skin remains **firm**, while the **Hyaluronic Acid** nourishes and **moisturises the collagen**.

Now you know: **the combination of 'ER' and 'Vita-A-Kombi' is a remarkably effective** weapon against advancing age and the formation of wrinkles.
